

Standard numeric format

Q1. why the output of this Equation = \$30.00?

Ans: The "C" (or currency) format specifier is used to convert a number to a string representing a currency amount

Q2. what is its benefit?

Ans: we can use it to set any number to any currency we want not just dollar

Q3. try another example with a different specifier with a screenshot of the output.

Ans:

```
int X = 10;  
int Y = 20;  
Console.WriteLine($"Equation: {X} + {Y} = {(X + Y).ToString("C", CultureInfo.CurrentCulture)}");
```

Microsoft Visual Studio Debug Console

Equation: 10 + 20 = \$30.00
